

Washington FSDO FAASTeam presents:

Advanced Weather Safety for Drones

Flying a drone is a significant responsibility that requires a professional and disciplined weather risk management approach. It requires a mindset and culture about truly understanding the micro-climate risks on any given day. An invisible weather threat, complacency and a false sense of weather knowledge and security is when bad things happen. This presentation will provide some “inside baseball” from a leading drone weather expert to enhance your weather knowledge game. He will provide tips on how to avoid complacency that can lead to losing a valuable asset, injuring someone and/or a lawsuit in what may have been a preventable incident.

Directions: This webinar will be conducted via Zoom. Please use the link below to register for the webinar.
<https://faavideo.zoomgov.com/meeting/register/vJlSceqpqDgvHMgmyhYx-QmpiKMNPSAhNT0>
Once you have registered, you will receive a verification email which will include the login and password information. This event is part of the 2021 Drone Safety Awareness Week.
